This machine has ★: 1. It can drive forward/backward in situ like an excavator (turn around in situ) 2. Left and right swing leveling unloading function (road repair leveling) 3. Synchronous 270 ° multi-angle rotation function 4. Side forward unloading function (applicable to canal, slope and roadside)! 5. Hydraulic full-time four-wheel drive, strong climbing, strong power!

★: with bucket, big arm, water tank, water pump, integrated. Their own shoveling, automatic water, their own transport, their own unloading, saving labor, saving forklifts, transport vehicles! It is very convenient and flexible to build roads, canals, slope protection, retaining walls, housing construction, rental and self-use!
